Harsh Anand

BACKEND DEVELOPER | API & FULL-STACK DEVELOPMENT

Jaipur, Rajasthan, India | harshanand55002@gmail.com
github.com/HARSHANAND15

PROFESSIONAL SUMMARY

- Builds maintainable backend services and full-stack applications using Node.js, TypeScript, Express, and modern web technologies.
- Delivered healthcare API modules, role-based access control, CRUD routes, and OpenAPI documentation during a completed Backend Developer internship.

PROFESSIONAL EXPERIENCE

Backend Developer Intern | Awwaltech

May 25 - Aug 25, 2026

- Engineered Patient and Doctor Management modules for a Node.js/TypeScript healthcare REST API.
- Implemented RBAC with Role/Module models and CRUD routes to deliver structured authorization.
- Resolved plaintext password storage and OTP bypass issues, strengthening authentication flows.
- Authored Swagger/OpenAPI 3.0 endpoint documentation and configured a Docker-based SQL Server environment.

TECHNICAL SKILLS

- Backend & APIs: Node.js, Express, REST APIs, TypeScript, JWT, RBAC, CRUD, Swagger/OpenAPI 3.0
- Databases & Developer Tools: MongoDB, SQL Server, Azure SQL, Docker, Git, GitHub, Postman
- Languages & Frontend: JavaScript, TypeScript, Java, Python, React, Next.js, HTML, CSS, Tailwind CSS
- Additional: WebSockets, Server-Sent Events \(SSE\), Firebase, Three.js, OCR \(Tesseract.js\), LLMs, Prompt Engineering

PROJECTS

Node.js + TypeScript API

- Built a typed REST API with scalable route/controller structure and clean architecture.
- Applied TypeScript to improve type safety and support maintainable backend development.
- Tech: Node.js, TypeScript, Express, REST APIs.
- GitHub: github.com/HARSHANAND15/Nodejs-ts-api

MentorLink

- Developed a full-stack mentorship marketplace with mentor discovery and profile management.
- Added a blog experience across a React frontend and Node.js backend.
- Tech: React, TypeScript, Node.js, MongoDB.
- GitHub: github.com/HARSHANAND15/mentorlink

Flask System Monitoring App

- Created a real-time dashboard to monitor CPU, memory, and system resource usage.
- Presented server metrics in a clear interface for at-a-glance monitoring.
- Tech: Python, Flask.
- GitHub: github.com/HARSHANAND15/Flask-system-monitoring-app

Harsh Anand

BACKEND DEVELOPER

harshanand55002@gmail.com | github.com/HARSHANAND15

PROJECTS | CONTINUED

Firebase Project | Kids Fun Learning

- Integrated Firebase authentication and realtime database features into a kids learning web app.
- Deployed the application to Firebase Hosting for public access.
- Tech: JavaScript, Firebase, Authentication, Realtime Database.
- GitHub: github.com/HARSHANAND15/Firebase-Project

Electronics E-Commerce Site

- Built an electronics storefront with product listings and intuitive browsing flows.
- Designed a clean frontend shopping experience for exploring products.
- Tech: HTML, CSS, JavaScript, E-Commerce.
- GitHub: github.com/HARSHANAND15/Electronics-site

Amazon Clone

- Recreated familiar e-commerce storefront patterns for product discovery.
- Implemented product browsing, cart interactions, and a recognizable shopping layout.
- Tech: HTML, CSS, JavaScript.
- GitHub: github.com/HARSHANAND15/Amazon-Clone

3D Portfolio Website

- Designed and developed an interactive portfolio with animated 3D wireframe scenes.
- Combined code-rain visuals, scroll-triggered reveals, and smooth scrolling for an immersive experience.
- Tech: React, TypeScript, Three.js, React Three Fiber, Tailwind CSS.
- GitHub: github.com/HARSHANAND15/Portfolio

EDUCATION

B.Tech in Computer Engineering | Poornima Institute of Engineering & Technology (PIET) 2023 - 2027

- Batch 2023-2027 | Section 7C

12th (Senior Secondary) | S.N.S.R.K.S College, Saharsa 2021 - 2023

10th (Secondary) | Eklavya Central School 2020 - 2021
